METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS is a monthly publication devoted to:

A. Current Abstracts in English on important meteorological and geoastrophysical literature in every language.

B. Bibliographic references to other items of interest to the profession.

C. Selective, annotated bibliographies on subjects of immediate and special interest to meteorologists, geophysicists and astrophysicists.

SUBSCRIPTION RATE: $90 ($15.00 per year to members). Prices for single copies $10 ($5 to members); back issues $6 ($3 to members); back volumes $30 ($15 to members); Vol. 1–10 complete, $200 ($100 to members).

ERRATA—VOLUME 13, 1962

Note: In the following list only more important errors are included. Discrepancies in style, punctuation, accents, capitalization, subject headings, etc., are not, as a rule, listed; nor are errors in the monthly indexes of each issue where these errors are corrected in this volume index. Errors of fact which have come to our attention, mistakes in spelling of the names of authors, and errors in title, journal entries or pagination are included. Any errors which have been overlooked should be called to our attention (by post card, addressed to: **Meteorological and Geoastrophysical Abstracts,** Box 1736, Washington 20013, D. C.).

CUMULATIVE AUTHOR INDEX

Vol. 13, No. 1–12, Jan.–Dec. 1962

Note: In this index, author entries are arranged alphabetically, and under each author, the titles are likewise arranged alphabetically by the first word of the title.

Authors and titles mentioned in the body of an abstract have also been indexed. References to authors and titles found in Part III (Translations and Contents of Journals) are included in the index.

Authors whose names begin with an article or preposition (van, de, di, le, la, etc.) are generally indexed under the article or preposition. Cross references indicate variations from that practice or possible alternate entries.

Titles have been shortened by eliminating articles and by omitting the end of long titles where feasible.

In this index all titles are listed under the first author. Co-authors, if any, are mentioned after the title.

Government Contracts, Projects, etc. are listed separately at the end of the Author Index. A separate Translation Index also appears at the end of the Author and Contract Index. Translations are indexed under the name of the original author, not the translator.

CUMULATIVE TRANSLATIONS INDEX

Vol. 13, Nos. 1–12, Jan.–Dec. 1962

Abovskiĭ, V. P.
- Unsolved problems in regions of intense snowfall (*with* **Veksman, A. M.; Volkov, V. M.** et al.) [Transl. from Russ. by D. E. Allen], 13.3–494

Abrosimov, A. T.
- Angular distribution of axes of extensive air showers at sea level (*with* **Goman'kov, V. I.; Ivanovskaia, I. A.** and **Sarycheva, L. I.**) [Transl. from Russ. by I. Emin], 13D–16

Acta Geographica Sinica, Peiping, China
- Articles on sand-carrying wind, temperature variations, and hydrography of certain areas in Communist China [Transl. from Chin.], 13.8–706

Adadurov, G. A.
- Study of the volumetric compressibility of marble at high pressure (*with* **Balashov, D. B.** and **Dremin, A. N.**) [Transl. from Russ.], p. 499

Afanas'ev, N. L.
- Direct method of interpreting anomalies Δ g. [Transl. from Russ.], p. 2072
- Smoothing of gravitational anomalies [Transl. from Russ.], p. 764

Afanas'eva, V. I.
- Preliminary results of the study of magnetic storms for the first half of IGY [Transl. from Russ.], 13.10–38

Ager, B. H:son
- Compacted snow road, Pt. 2 [Transl. from Swed.], 13.4–93

Aizenshtat, B. A.
- Heat balance and microclimate of certain landscapes in a sandy desert [Transl. from Russ.], p. 789

Akademiia Nauk SSSR
- [Obituary of] Alekseĭ Georgievich Kalashnikov [Transl. from Russ.], p. 2074
- [Obituary of] Vladimir Grigor'evich Kastrov [Transl. from Russ.], p. 499
- [Obituary of] Z. G. Veĭs-Ksenofontova [Transl. from Russ.], p. 2401

Aksenov, E. P.
- General solution of the problem of an artificial satellite moving in the normal gravitational field of the Earth (*with* **Grebenikov, E. A.** and **Demin, V. G.**) [Transl. from Russ.], p. 3724
- One class of periodic solutions in the restricted three-body problem [Transl. from Russ.], p. 1119

Aleksandrov, K. S.
- Elastic properties of rock-forming minerals, [Pt. 1?] (*with* **Ryzhova, T. V.**) [Transl. from Russ.], p. 1051; Pt. 3, p. 2075

Alekseev, V. M.
- Theorem in the theory of perturbed motion [Transl. from Russ.], p. 1119

Alpat'ev, A. M.
- Soil moistening and biological effect of precipitation [Transl. from Russ.], 13.4–355

Al'pert, Ia. L.
- Investigations of the ionosphere and the interplanetary gas with the aid of artificial Earth satellites and space rockets [Transl. from Russ.], p. 3724
- Statistical heterogeneity of the ionosphere [Transl. from Russ. by C. E. Townsend], 13J–2

Al'tshuler, L. V.
- Internal structure of the Earth (*with* **Kormer, S. B.**) [Transl. from Russ.], 13.8–301

Ambartsumian, V. A.
- On equilibrium configurations of superdense degenerate gas masses (*with* **Saakian, G. S.**) [Transl. from Russ.], p. 1456
- Theoretical astrophysics [Transl. from Russ. by J. B. Sykes], 13K–83
- Theoretische Astrophysik (*with* **Mustel', E. R.** (eds.) [Transl. from Russ.], 13K–83

Andreev, S. S.
- Use of epicentral lines when the velocity profile is unknown [Transl. from Russ.], p. 764

Andreeva, O. L.
- Paleomagnetic investigation of krasnotsvet clays of the Gzhelian stage in the Moscow basin [Transl. from Russ.], p. 1051

Andronikashivili, E. L.
- Experimental investigation of the energy spectrum of the penetrating component of extensive air showers [Transl. from Russ.], 13D–36

Antonov, V. S.
- Role of continental drainage in the current regime of the Arctic Ocean [Transl. from Russ.], p. 515

Antonova, L. A.
- Measurement of corpuscular radiation at heights up to 100 kilometers [Transl. from Russ.], p. 1051
- Measurement of corpuscular radiation in the upper atmosphere (*with* **Ivanov-Kholodnyĭ, G. S.**) [Transl. from Russ.], 13A–7

Arkhangel'skaia, V. M.
  Comprehensive seminar of the Seismology and Seismic Service Branch of the Institute of Physics of the Earth, Acad. Sci. USSR, on the study of surface waves [Transl. from Russ.], p. 499
  Damping of surface Rayleigh waves (*with* **Fedorov, S. A.**) [Transl. from Russ.], p. 1050
  Investigation of short-period surface seismic Rayleigh waves [Transl. from Russ.], p. 1050
Arkhangel'skiĭ, V. T.
  Observations of long-period seismic waves at the Simferopol Station (*with* **Kirnos, D. P.; Popov, I. I.** and **Solov'ev, V. N.**) [Transl. from Russ.], p. 499
  Questions concerning the theory of the long-period vertical seismometer [Transl. from Russ.], p. 2072
Arkhipova, V. P.
  Emission star HD 51585 [Transl. from Russ.], p. 3741
Arrago, L. R.
  On a method of solving the diffusion equation for the atmosphere [Transl. from Russ.], p. 1447
Artemova, N. E.

CUMULATIVE GEOGRAPHIC INDEX

In this index of geographical places there are three major sections:

A. Hemispheres and Regions
B. Continents
C. Oceans, Seas and Islands (including Antarctic and Arctic)

An alphabetical or dictionary type of arrangement is followed for all divisions and subdivisions of these major groups. For example, in Section B, the continents are arranged alphabetically as follows:

1. **Africa**
2. **Asia**
3. **Australasia** (Australia, East Indies and New Zealand)
4. **Europe**
5. **North America**
6. **South America**

Within each continent the regions or main topographical features are listed alphabetically, followed by the countries in alphabetical order. No attempt has been made to distinguish between political and geographical regions or sub-regions.

Within each country all regions, states, provinces, cities or other geographical features falling entirely within that country form a single alphabetical list, except in Australia, Canada, the Union of Soviet Socialist Republics and the United States where cities are alphabetized under their respective states or provinces.

In Section C the principal oceans and seas and their respective divisions have been arranged alphabetically. Islands not naturally associated with one or another of the continents have been assigned to the body of water in which they are located. Seas which fall entirely within one continent have been assigned to that continent with the exception of Section F, Oceanography, in Part I of each monthly issue and the special bibliographies on oceanography, 13E and 13I. In the latter, islands as well as bodies of water have been arranged under the respective ocean in which they are located. Thus, islands and seas will be found under both: **B. Continents** as well as **C. Oceans, Seas and Islands** with no individual cross-references indicated.

Australasia includes **Australia, the East Indies** and **New Zealand; Japan** and the **Philippines** are under **Asia,** and **Greenland** under **North America.**

The Antarctic Regions include the Antarctic continent and the bordering seas. It has been arbitrarily assigned to Section **C** on **Oceans, Seas and Islands** to preserve its analogy to the **Arctic.**

All references to the whole of the **U.S.S.R.** (Russia) will be found in the section under Europe. Places definitely in **Asiatic U.S.S.R.** (Siberia, Kazakhstan, etc.) will be listed under the appropriate country or area under **Asia.** Some of the latter may be also listed under **U.S.S.R.** in the European sections.

All references to the whole of **Germany** (pre-World War II Germany) and references to places overlapping the boundary between East and West Germany will be found under **Germany** (general and undetermined). References to places within the Federal Republic and within the Democratic Republic will be listed under these two headings, respectively.
